### Section 2. Hazards identification

| Classification of the | : FLAMMABLE LIQUIDS - Category 3  |
|-----------------------|---|
| substance or mixture  | ACUTE TOXICITY (dermal) - Category 4  |
|                       | ACUTE TOXICITY (inhalation) - Category 4  |
|                       | SKIN CORROSION/IRRITATION - Category 2  |
|                       | SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A  |
|                       | SKIN SENSITIZATION - Category 1   |
|                       | SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract   |
|                       | irritation) - Category 3<br>SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2   |
|                       |   |
|                       | Percentage of the mixture consisting of ingredient(s) of unknown oral toxicity: 48.4%<br>Percentage of the mixture consisting of ingredient(s) of unknown dermal toxicity: 86.5%<br>Percentage of the mixture consisting of ingredient(s) of unknown inhalation toxicity: 29.<br>8% |
| GHS label elements    |   |
| Hazard pictograms     |   |
| Signal word           | : Warning   |

1/13

## Section 2. Hazards identification

| Hazard statements                | <ul> <li>Flammable liquid and vapor.<br/>Harmful in contact with skin or if inhaled.<br/>Causes serious eye irritation.<br/>Causes skin irritation.<br/>May cause an allergic skin reaction.<br/>May cause respiratory irritation.<br/>May cause damage to organs through prolonged or repeated exposure.</li> </ul>   |
|----------------------------------|--|
| Precautionary statements         |  |
| Prevention                       | : Wear protective gloves. Wear eye or face protection. Wear protective clothing. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Keep container tightly closed. Use only outdoors or in a well-ventilated area. Do not breathe vapor. Wash hands thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace.  |
| Response                         | : Get medical attention if you feel unwell. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or physician if you feel unwell. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF ON SKIN: Wash with plenty of soap and water. Call a POISON CENTER or physician if you feel unwell. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.   |
| Storage                          | : Store locked up. Store in a well-ventilated place. Keep cool.  |
| Disposal                         | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> </ul>  |
| Supplemental label<br>elements   | <ul> <li>DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE. Contains solvents which can cause permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. FOR PROFESSIONAL USE ONLY. This product must be mixed with other components before use. Before opening the packages, READ AND FOLLOW WARNING LABELS ON ALL COMPONENTS. VAPOR AND SPRAY MIST HARMFUL. Gives off harmful vapor of solvents and isocyanates. DO NOT USE IF YOU HAVE CHRONIC (LONG-TERM) LUNG OR BREATHING PROBLEMS, OR IF YOU HAVE EVER HAD A REACTION TO ISOCYANATES. USE ONLY WITH ADEQUATE VENTILATION. WHERE OVERSPRAY IS PRESENT, A POSITIVE PRESSURE AIR SUPPLIED RESPIRATOR (NIOSH approved) SHOULD BE WORN TO PREVENT EXPOSURE. IF UNAVAILABLE, AN APPROPRIATE PROPERLY FITTED APPROVED NIOSH VAPOR/PARTICULATE RESPIRATOR MAY BE EFFECTIVE. Follow directions for respirator use. Wear the respirator for the whole time of spraying and until all vapors and mists are gone. If you have any breathing problems during use, LEAVE THE AREA and get fresh air. If problems remain or happen later, IMMEDIATELY call a doctor - If not available get emergency medical treatment. Have this label with you. Reacts with water in closed container to produce pressure which may cause container to burst.</li> </ul> |
| Hazards not otherwise classified | : None known.  |

## Section 3. Composition/information on ingredients

| Substance/mixture                | : Mixture        |
|----------------------------------|------------------|
| Other means of<br>identification | : Not available. |

#### **CAS number/other identifiers**

## Section 3. Composition/information on ingredients

| -                                  |             |            |
|------------------------------------|-------------|------------|
| Ingredient name                    | % by weight | CAS number |
| Hexamethylene Diisocyanate Polymer | 48.35       | 28182-81-2 |
| p-Chlorobenzotrifluoride           | 29.77       | 98-56-6    |
| 2-Butoxyethyl Acetate              | 13.37       | 112-07-2   |
| Methyl n-Amyl Ketone               | 8.42        | 110-43-0   |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

| Description of necessary fir | st aid measures   |
|------------------------------|---|
| Eye contact                  | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10<br/>minutes. Get medical attention.</li> </ul>   |
| Inhalation                   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact                 | : Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. If necessary, call a poison center or physician. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |
| Ingestion                    | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention following exposure or if feeling unwell. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.   |

#### Most important symptoms/effects, acute and delayed

| Potential acute health | <u>n effects</u>   |
|------------------------|--|
| Eye contact            | : Causes serious eye irritation.   |
| Inhalation             | : Harmful if inhaled. May cause respiratory irritation.                                      |
| Skin contact           | : Harmful in contact with skin. Causes skin irritation. May cause an allergic skin reaction. |
| Ingestion              | : No known significant effects or critical hazards.  |
| Over-exposure signs    | /symptoms  |
| Eye contact            | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |
| Inhalation             | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing    |

| Date of issue | /Date of revision   | : 3/2/2018 | Date of previous issue | : 9/3/2017 | Version : 4.01   | 3/13 |
|---------------|---|------------|------------------------|------------|------------------|------|
| FH742         | FH742 FINISH 1 <sup>™</sup> 2.1 VOC Clearcoat Hardener (Part B)<br>Medium |            |                        |            | SHW-85-NA-GHS-CA |      |

## Section 4. First aid measures

| Skin contact                | : Adverse symptoms may include the following:<br>irritation<br>redness  |
|-----------------------------|---|
| Ingestion                   | : No specific data.   |
|                             |   |
| Indication of immediate med | ical attention and special treatment needed, if necessary   |
| Notes to physician          | <ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br/>The exposed person may need to be kept under medical surveillance for 48 hours.</li> </ul>   |
| Specific treatments         | : No specific treatment.  |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

## Section 5. Fire-fighting measures

| Extinguishing media                            |  |
|--|--|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media                 | : Do not use water jet.  |
| Specific hazards arising from the chemical     | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>halogenated compounds<br>carbonyl halides   |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

## Section 6. Accidental release measures

| Personal precautions, protective equipment and emergency procedures |   |  |  |  |  |
|---|---|--|--|--|--|
| For non-emergency<br>personnel                                      | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment. |  |  |  |  |
| For emergency responders  | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |  |  |  |  |

#### Environmental precautions :

| Date of issue/Date of | of revision                   | : 3/2/2018      | Date of previous issue | : 9/3/2017 | Version | <b>:</b> 4.01 | 4/13 |
|-----------------------|-------------------------------|-----------------|------------------------|------------|---------|---------------|------|
|                       | FINISH 1™ 2.1 VOC C<br>Medium | learcoat Harder | er (Part B)            |            | SHW-85- | NA-GHS-CA     |      |

## Section 6. Accidental release measures

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

#### Methods and materials for containment and cleaning up

| Small spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
|-------------|--|
| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

### Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures  | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Advice on general<br>occupational hygiene                          | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | Store in accordance with local regulations. Store in a segregated and approved area.<br>Store in original container protected from direct sunlight in a dry, cool and well-ventilated<br>area, away from incompatible materials (see Section 10) and food and drink. Store<br>locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep<br>container tightly closed and sealed until ready for use. Containers that have been<br>opened must be carefully resealed and kept upright to prevent leakage. Do not store in<br>unlabeled containers. Use appropriate containment to avoid environmental<br>contamination. See Section 10 for incompatible materials before handling or use.  |

### Section 8. Exposure controls/personal protection

<u>Control parameters</u> <u>Occupational exposure limits (OSHA United States)</u>

## Section 8. Exposure controls/personal protection

| Ingredient name                    | Exposure limits                      |
|------------------------------------|--------------------------------------|
| Hexamethylene Diisocyanate Polymer | None.                                |
| p-Chlorobenzotrifluoride           | None.                                |
| 2-Butoxyethyl Acetate              | NIOSH REL (United States, 10/2016).  |
|                                    | TWA: 5 ppm 10 hours.                 |
|                                    | TWA: 33 mg/m <sup>3</sup> 10 hours.  |
|                                    | ACGIH TLV (United States, 3/2016).   |
|                                    | TWA: 20 ppm 8 hours.                 |
| Methyl n-Amyl Ketone               | ACGIH TLV (United States, 3/2016).   |
|                                    | TWA: 50 ppm 8 hours.                 |
|                                    | TWA: 233 mg/m <sup>3</sup> 8 hours.  |
|                                    | NIOSH REL (United States, 10/2016).  |
|                                    | TWA: 100 ppm 10 hours.               |
|                                    | TWA: 465 mg/m <sup>3</sup> 10 hours. |
|                                    | OSHA PEL (United States, 6/2016).    |
|                                    | TWA: 100 ppm 8 hours.                |
|                                    | TWA: 465 mg/m <sup>3</sup> 8 hours.  |

#### **Occupational exposure limits (Canada)**

| ngredient name        | Exposure limits   |
|-----------------------|---|
| 2-Butoxyethyl Acetate | CA British Columbia Provincial (Canada,<br>7/2016).<br>TWA: 20 ppm 8 hours.<br>CA Ontario Provincial (Canada, 7/2015).<br>TWA: 20 ppm 8 hours.<br>CA Alberta Provincial (Canada, 4/2009).<br>8 hrs OEL: 131 mg/m <sup>3</sup> 8 hours.<br>8 hrs OEL: 20 ppm 8 hours.<br>CA Saskatchewan Provincial (Canada,<br>7/2013).<br>STEL: 30 ppm 15 minutes.<br>TWA: 20 ppm 8 hours.   |
| Methyl n-Amyl Ketone  | CA Alberta Provincial (Canada, 4/2009).<br>8 hrs OEL: 233 mg/m <sup>3</sup> 8 hours.<br>8 hrs OEL: 50 ppm 8 hours.<br>CA British Columbia Provincial (Canada,<br>7/2016).<br>TWA: 50 ppm 8 hours.<br>CA Ontario Provincial (Canada, 7/2015).<br>TWA: 25 ppm 8 hours.<br>TWA: 115 mg/m <sup>3</sup> 8 hours.<br>CA Québec Provincial (Canada, 1/2014).<br>TWAEV: 50 ppm 8 hours.<br>TWAEV: 233 mg/m <sup>3</sup> 8 hours.<br>CA Saskatchewan Provincial (Canada,<br>7/2013).<br>STEL: 60 ppm 15 minutes.<br>TWA: 50 ppm 8 hours. |

| Ingredient name       | Exposure limits   |
|-----------------------|---|
| 2-Butoxyethyl Acetate | NOM-010-STPS-2014 (Mexico, 4/2016).<br>TWA: 20 ppm 8 hours. |
| Methyl n-Amyl Ketone  | NOM-010-STPS-2014 (Mexico, 4/2016).<br>TWA: 50 ppm 8 hours. |

| Date of issue/Date | of revision                   | : 3/2/2018      | Date of previous issue | : 9/3/2017 | Version | : 4.01    | 6/13 |
|--------------------|-------------------------------|-----------------|------------------------|------------|---------|-----------|------|
| FH742              | FINISH 1™ 2.1 VOC C<br>Medium | learcoat Harden | er (Part B)            |            | SHW-85- | NA-GHS-CA |      |

## Section 8. Exposure controls/personal protection

| controls                             | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |
|--------------------------------------|--|
| Environmental exposure :<br>controls | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |
| Individual protection measures       | <u>3</u>   |
| Hygiene measures :                   | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |
| Eye/face protection :                | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.   |
| Skin protection                      |  |
| Hand protection :                    | Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated. |
| Body protection :                    | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.  |
| Other skin protection :              | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection :             | Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.   |

## Section 13. Disposal considerations

#### **Disposal methods**

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Not applicable.

### Section 16. Other information

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

## Section 16. Other information

#### Notice to reader

It is recommended that each customer or recipient of this Safety Data Sheet (SDS) study it carefully and consult resources, as necessary or appropriate, to become aware of and understand the data contained in this SDS and any hazards associated with the product. This information is provided in good faith and believed to be accurate as of the effective date herein. However, no warranty, express or implied, is given. The information presented here applies only to the product as shipped. The addition of any material can change the composition, hazards and risks of the product. Products shall not be repackaged, modified, or tinted except as specifically instructed by Sherwin-Williams, including but not limited to the incorporation of non Sherwin-Williams products or the use or addition of products in proportions not specified by Sherwin-Williams. Regulatory requirements are subject to change and may differ between various locations and jurisdictions. The customer/buyer/user is responsible to ensure that his activities comply with all country, federal, state, provincial or local laws. The conditions for use of the product are not under the control of the manufacturer; the customer/buyer/user is responsible to determine the conditions necessary for the safe use of this product. The customer/buyer/user should not use the product for any purpose other than the purpose shown in the applicable section of this SDS without first referring to the supplier and obtaining written handling instructions. Due to the proliferation of sources for information such as manufacturer-specific SDS, the manufacturer cannot be responsible for SDSs obtained from any other source.
